

Cinderella Eco Incineration Toilet

Installation and Service Engineer Network

Cinderella UK Retail Outlets

We have an expanding network of installers and service engineers that can help our, and maybe your customers, with installations and maintenance of their Cinderella Toilet.

To find out more about joining our team please call Clive on [07934 358030](tel:07934358030) for more information

Cinderella's are either powered by electricity or Propane.

They can be fitted in static or mobile situations.

They are suitable for many applications, on and off-grid, including motorhomes, canal boats, garden rooms, shepherds' huts, steel containers, pontoons, trailers, etc.

We can provide training at our premises near either Banbury or Reading. We can also arrange to come to you with our training and demonstration units.

We supply support documentation to supplement your training and hold a wide range of spares which might be required. Advice and guidance are usually available by phone, even out of working hours.

If you are a retailer and would like to see our demonstration models or know more about these innovative products, please call [07934 358030](tel:07934358030)
